

STATE OF CALIFORNIA—DEPARTMENT OF PUBLIC WORKS
DIVISION OF WATER RESOURCES
STATE ENGINEER

ORDER

APPLICATION 186

PERMIT 72

LICENSE 1753

ORDER AMENDING LICENSE

WHEREAS License 1753 was issued on June 14, 1937 confirming the right initiated under Application 186 for an amount of water not to exceed 17.5 cubic feet per second to be diverted from Sacramento River at a point within the NW $\frac{1}{4}$ of NE $\frac{1}{4}$ of projected Section 13, T 17 N, R 2 W., M.D.B. & M., from about April 1 to about November 1 of each season for the irrigation of 1796 acres comprising the S $\frac{1}{2}$ of Section 15 and the N $\frac{1}{2}$ of Section 22, T 17 N, R 2 W., M.D.B. & M., within Maxwell Irrigation District and 1156 acres in the "Packer Tract" in projected Sections 13, 14, 23 and 24, T 17 N, R 2 W., M.D.B. & M., all as shown on a map entitled "Map of the Blevins-Mellom Ditch Company's Irrigation Project" filed January 3, 1916 with the State Water Commission, now the Division of Water Resources, and

WHEREAS the amount of water named in the license was determined from the use of water made during the 1933 irrigation season at which time 10 cubic feet per second were beneficially used on the 1796 acres and 7.5 cubic feet per second were beneficially used on the 1156 acre Tract, and

WHEREAS the records of the State Engineer's office indicate that not since 1934 has any water under License 1753 been used on the 1796 acre tract and it therefore appears, that that part of

License 1753 relating to the use of water on the 1796 acre tract has been lost by non-use, and

WHEREAS by notice given, and hearing held January 15, 1945, licensees were given opportunity to appear and show cause (1) why the interest of Maxwell Irrigation District should not be stricken from the license, (2) why the amount of water stated and (3) why the acreage described in the license should not be reduced, and licensees having failed to appear or show cause why said changes in the license should not be made,

NOW THEREFORE IT IS HEREBY ORDERED that License 1753 be and the same is hereby amended by striking therefrom (1) the name of Maxwell Irrigation District as a co-licensee; (2) by reducing the appropriation from 17.5 cubic feet per second to 7.5 cubic feet per second; and (3) by reducing the area of service therein from 2952 acres to the 1156 acres of the Packer Tract.

WITNESS my hand and the seal of the Department of Public Works of the State of California this 9th day of March, 1945.

EDWARD HYATT, State Engineer

By _____
Deputy State Engineer

STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS
DIVISION OF WATER RESOURCES

License for Diversion and Use of Water

Notice of Assignment (Over)

LICENSE 1753

PERMIT 72

APPLICATION 186

THIS IS TO CERTIFY, That ~~Maxwell Irrigation District of Colusa, California,~~
and Clara C. Packer of Colusa, California,

have made proof to the satisfaction of the Division
of Water Resources of California of a right to the use of the waters of **Sacramento River in Colusa County**

tributary of **Suisun Bay**

for the purpose of **irrigation use**

under Permit **72** of the Division of Water Resources and that said right to the use of said waters has
been perfected in accordance with the laws of California, the rules and regulations of the Division of Water Resources
and the terms of the said permit; that the priority of the right herein confirmed dates from **November 22, 1915;**

that the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited
to the amount actually beneficially used for said purposes and shall not exceed **seventeen and five tenths**
(17.5) cubic feet per second from about April 1st to about November 1st of each
season. In case of rotation the equivalent of such continuous flow allowance
for any thirty day period may be diverted in a shorter time if there be no
interference with other vested rights.

The point of diversion of such water is located **South eighty-seven degrees thirty-two**
minutes East (S. 87°32' E.) eight thousand seven hundred eighty-nine (8789) feet
from the northeast corner of fractional Section 15, T 17 N, R 2 W, M.D.B.M. and
being within the NW $\frac{1}{4}$ of NE $\frac{1}{4}$ of projected Section 13, T 17 N, R 2 W, M.D.B.M.

A description of the lands or the place where such water is put to beneficial use is as follows:

1796 acres composed of the S $\frac{1}{4}$ of Section 15 and the N $\frac{1}{4}$ of Section 22, T 17 N,
R 2 W, M.D.B.M., and 1156 acres in the "Packer Tract" in projected Sections
13, 14, 23 and 24 of said township, all as shown on a map entitled "Map of the
Elevins-Mallon Ditch Company's Irrigation Project" filed January 3, 1916, with
the State Water Commission, now Division of Water Resources.

As there is a possibility that there will not be sufficient water in Sacra-
mento River during the latter part of the irrigation season to satisfy all re-
quirements, this license is issued subject to the express condition that the use
hereunder may be regulated by the Division of Water Resources during such periods
of water scarcity to the end that such use will not interfere with rights under
prior applications.

Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from
time to time by the Division of Water Resources.

The right to the diversion and use of the water aforesaid hereby confirmed is restricted to the point of
diversion herein specified and to the lands or place of use herein described.

This license is granted and said appropriator takes all rights herein mentioned subject to the terms and conditions set forth in Section 20 of Chapter 586, Statutes 1913, which is as follows:

Sac. 20. All permits and licenses for the appropriation of water shall be under the terms and conditions of this act, and shall be effective for such time as the water actually appropriated under such permits and licenses shall actually be used for the useful and beneficial purpose for which said water was appropriated, but no longer; and every such permit or license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this section and likewise the statement that any appropriator of water, to whom said permit or license may be issued, shall take the same subject to such conditions as therein expressed; *provided*, that if, at any time after the expiration of twenty years after the granting of a license, the state, or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the state shall have the right to purchase the works and property occupied and used under said license and the works built or constructed for the enjoyment of the rights granted under said license; and in the event that the said state, city, city and county, municipal water district, irrigation district, lighting district or political subdivision of the state so desiring to purchase the said owner of said works and property can not agree upon said purchase price, said price shall be determined in such manner as is now or may hereafter be determined in eminent domain proceedings. If it shall appear to the state water commission at any time after a permit or license is issued as in this act provided that the permittee or licensee, or the heirs, successors or assigns of said permittee or licensee, has not put the water granted under said permit or license to the useful or beneficial purpose for which the permit or license was granted, or that the permittee or licensee, or the heirs, successors or assigns of said permittee or licensee, has failed to observe any of the terms and conditions in the permit or license as issued, then and in that case the said commission, after due notice to the permittee, licensee, or the heirs, successors or assigns of such permittee or licensee, and a hearing thereon, may revoke said permit or license, and declare the water to be unappropriated and open to further appropriation in accordance with the terms of this act. And the findings and declaration of said commission shall be deemed to be prima facie correct until modified or set aside by a court of competent jurisdiction; *provided*, that any action brought so to modify or set aside such finding or declaration must be commenced within thirty days after the service of notice of said revocation on said permittee or licensee, his heirs, successors or assigns. And every licensee or permittee under the provisions of this act if he accepts such permit or license shall accept the same under the conditions precedent that no value whatsoever in excess of the actual amount paid to the state therefor shall at any time be assigned to or claimed for any permit or license granted or issued under the provisions of this act, or for any rights granted or acquired under the provisions of this act, in respect to the regulations by any competent public authority of the services or the price of the services to be rendered by any permittee or licensee, his heirs, successors or assigns or by the holder of any rights granted or acquired under the provisions of this act, or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the state or any city, city and county, municipal water district, irrigation district, lighting district or any political subdivision of the state, of the rights and property of any permittee or licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this act. The application for a permit by municipalities for the use of water for said municipalities or the inhabitants thereof for domestic purposes shall be considered first in right, irrespective of whether they are first in time; *provided, however*, that such application for a permit or the granting thereafter of permission to any municipality to appropriate waters, shall not authorize the appropriation of any water for other than municipal purposes; and *provided, further*, that where permission to appropriate is granted by the state water commission to any municipality for any quantity of water in excess of the existing municipal needs therefor, that pending the application of the entire appropriation permitted, the state water commission shall have the power to issue permits for the temporary appropriation of the excess of such permitted appropriation over and above the quantity being applied from time to time by such municipality; and *provided, further*, that in lieu of the granting of such temporary permits for appropriation, the state water commission may authorize such municipality to become as to such surplus a public utility, subject to the jurisdiction and control of the railroad commission of the State of California for such period or periods from and after the date of the issuance of such permission to appropriate, as may be allowed for the application to municipal uses of the entire appropriation permitted; and *provided, further*, that when such municipality shall desire to use the additional waters granted in its said application it may do so upon making just compensation for the facilities for taking, conveying and storing such additional water rendered valueless for said purposes, to the person, firm or corporation which constructed said facilities for the temporary use of said excess waters; and which compensation, if not agreed upon between the municipality and said person, firm or corporation, may be determined in the manner provided by law for determining the value of property taken by and through eminent domain proceedings.

Witness my hand and the seal of the Department of Public Works of the State of California, this fourteenth day of June, 1937.
